

EAST TEXAS GEOLOGICAL SOCIETY

TYLER, TEXAS

May 1, 1951

Mr. Leslie Bowling
Chairman of Steering Committee
Association of Gulf Coast Geological Societies
510 California Building
New Orleans 12, Louisiana

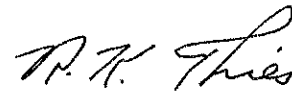

Dear Les:

I apologize for not having advised you sooner that the East Texas Geological Society has voted to become a member of the Gulf Coast Association of Geological Societies. I am sure that we will contribute all the support that we can, and will endeavor to bear our share of the burden, especially now in the early day of organization.

Mr. Robert Eaton of the Humble Oil and Refining Company, Box 2025, Tyler, Texas, is now President of our Society. According to the elected will of our Society the current President will serve as our representative of our Steering Committee. Hence, Mr. Eaton is now our representative, and the alternate is the Vice-President elect Mr. W. J. Amis of the Shell Oil Company, Box 2037, Tyler.

As I went out of Office yesterday this letter is actually written "post officio" or something to that effect. Anyway, it was my duty to let you know our decision to join the Association, and I have done so, though belatedly.

Very truly yours,

R. K. Thies
