Mr. Leslie Bowling,
510 California Building,
New Orleans, Louisiana.

Dear Les:

The Houston Geological Society's representative in the Gulf Coast Association of Geological Societies, Mr. E. L. Earl, has requested that you be given the number of members we have in our Society. The latest count places this figure at seven hundred fifty members.

One hundred fifty members attended our last Society meeting, fifty of whom stated that they planned to attend the Gulf Coast Association of Geological Societies Convention in New Orleans on November 15th, 16th, and 17th. Using this as a basis, it is my opinion that approximately 30% of our membership, or about 225 members will attend the convention.

Sincerely yours,

Ralph B. Cantrell
