BEST PAPER AWARDS 12TH ANNUAL MEETING

Awards for the best papers presented at the G.C.A.G.S. Twelfth Annual Meeting in New Orleans were as follows: First Place—General Geology Category "Subsurface Lower Cretaceous Stratigraphy, Central Texas" by Delos R. Tucker. Second Place—General Geology "Improved Interpretation of Formation Productivity by Combined use of Core Analysis and Electric Log Data" by Raymond J. Granberry and Richard C. Wilshusen. First Place—Regional Study Groups "The Camerina and Cibicides Hazzardi Stratigraphic Intervals of Southwest Louisiana." Lafayette Geological Society Study Group; Chairman, Frank W. Harrison, Jr. First Place—Paleontological Category (tie) "Biostratigraphy of South Central Lafourche Parish, Louisana" by Gerald C. Glaser, "Application of Marine Ecology in the Gulf Coast Tertiary" by William R. Walton.

DELOS R. TUCKER received his B.S. and M.S. degrees in Geology at Louisiana State University and earned his PhD. at the University of Texas. He is a Professor at Glendale City College, Glendale, California.

R. C. WILSHUSEN was graduated from S.M.U. in Engineering and is currently employed by Core Lab in Corpus Christi, Texas

WILLIAM R. WALTON earned his A.B. in Geology at Amherst College and his M.S. and PhD at Harvard University. He is presently employed as Division Consulting Geologist for the Gulf Coast Division of Pan American Petroleum Corporation.

GERALD C. GLASER received his B.S. and M.S. in Geology at Tulane University and is now working on his PhD at the University of Oklahoma.

R. J. GRANBERRY graduated from Louisiana State University in Geology and is a District Manager for Core Lab in Lafayette, Louisiana.

GULF COAST ASSOCIATION OF GEOLOGICAL SOCIETIES REPORT OF THE PRESIDENT 1963

The Gulf Coast Association of Geological Societies is celebrating its thirteenth anniversary this year with its annual convention being held in Shreveport, Louisiana. It is also the fifth year in a row in which the Gulf Coast Association of Geological Societies Convention has been designated as a regional meeting of the American Association of Petroleum Geologists.

The title "Stratigraphic Oil—The Promise of the Future" was appropriately selected as the central theme for our Convention Program. Everyone recognizes the significance stratigraphic traps play in the exploration for oil and gas in the Gulf Coast Area. With this in mind, your Convention Committeemen are to be commended for the excellent symposium papers and studies selected along this theme and for their timely geological contributions to Gulf Coast Geology.

The "Transactions" this year has been dedicated to the memory of Mr. C. L. Moody, a pioneer and ardent supporter of the Gulf Coast Association of Geological Societies.

Mr. "Bob" Rogers, Treasurer of the G.C.A.G.S., will report on the financial status of the G.C.A.G.S. at the Convention.

Many problems confront our organization from year to year. One of vital importance to us at this time is the matter of incorporation. A special committee composed of Br. Bob Rogers, Chairman, Mr. Sarl Knott and Mr. Bill Bancroft, all members of the Executive Committee, was appointed to study this question and make its recommendation to the Executive Committee before Convention time. The decision of the Executive Committee concerning incorporating the G.C.A.G.S. will be announced at the Convention.

I would like to personally thank each and every one of you concerned with the Convention for the tremendous amount of effort and work put forth to insure the success of the Thirteenth Annual Convention of the G.C.A.G.S., the first one held in Shreveport in ten years.

It has indeed been an honor and a pleasure to have served as your President this year.

J. C. BYRD

Fir. Sec Ele ina mai

GULF COAST ASSOCIATION OF GEOLOGICAL SOCIETIES REPORT OF THE GENERAL CHAIRMAN

The General Chairman is given the responsibility for staging the Convention and all of the related activities. While at first this generally appears to be an insurmountable job, with the aid of a number of dedicated individuals, the Convention is held and with each succeeding year seems to run more smoothly. The last Gulf Coast Association meeting held in Shreveport was the third annual Convention held in 1953, and since the association had been in existence such a short time, the 1953 meeting possibly left a little to be desired. The 1963 Shreveport group were determined that this Convention would be well organized and a credit to the Shreveport Geological Society and a credit to the City of Shreveport.

When the theme was picked for this meeting, the theme "Stratigraphic Oil, the Promise of the Future" was chosen, with the knowledge that much of our domestic exploration of the future will be for stratigraphic production. Our Joint Program Chairmen have advised me that a number of representatives of different societies have indicated that various Society Members were not allowed to work on these programs by their individual companies, since the individual companies were doing specialized research in stratigraphic fields. It was felt that by the Society Study Group Method a paper could be put out in each society listing the various types of stratigraphic production for that general area and generalized stratigraphic potential and on that basis the theme would not infringe too much on company individual research programs. We are most pleased with the series of papers which have been furnished the Program Chairman and Editor and are included in the transactions. We especially wish to commend the New Orleans and Lafayette Study Groups for their study group papers. We consider that the 1963 program will give each serious attendant something to think about and conceiveably new techniques to apply.

For the first time, the advertising will be distributed through the book rather than in the back of the transactions volume. In part, by virtue of this difference from the normal manner of publication, the advertising committee have sold over \$9,000.00 worth of advertising. We ask that you inspect the present transactions and instruct your representative to the Gulf Coast Association as to your feelings in this matter. One representative representing one society objected to this method of distributing the advertising through the book and if enough society representatives find it seriously objectionable, it will become a matter to be voted on at future Executive Committee Meetings. We of Shreveport do not consider it objectionable and it certainly sold more advertising.

The Treasurer of the Association will make certain reports to the Convention regarding the classification of the association as a non-profit institution by the Bureau of Internal Revenue. This determination of non-profit status is one of our more important problems and the Executive Committee of the association will have certain duties to perform in causing the association to be declared a non-profit institution.

The Convention Chairman is appointed by the Host Society each year, one year plus in advance of the annual convention. He in turn appoints various Chairmen to handle the necessary functions. In other places in this volume and in the program for the meeting you will note the detailed list of Chairmen for the various activities. I would like to make the association aware of how fortunate we were to have the Chairmen who have worked on this meeting. Each of the gentlemen and ladies whom you find listed have accepted their part in the staging of this affair and have devoted considerable of their time to the details on their part of this function. As previous Convention Chairmen have noticed, invaribly we find a host of willing workers who accept the responsibility for doing a part of these meetings. We were fortunate in Shreveport in setting up a smooth running organization of willing people and we feel their work will be shown in the manner in which this Convention will function.

This 1963 transaction book is a further excellent addition to the library of geological knowledge affecting the Gulf Coast and in common with the twelve previous transaction books represents a wealth of geological data which will aid in the finding of new sizeable reserves in the Gulf Coast province.

REPORT OF THE PRESIDENT 1963

The Gulf Coast Section of the Society of Economic Paleontologists and Mineralogists has completed its tenth year. During this decade, there has been continuous close cooperation between the Section and the Gulf Coast Association of Geological Societies, particularly as regards the annual G.C.A.G.S. convention. Members of the Gulf Coast Section have presented the sixty-eight papers at these meetings from 1954 through 1962. There is no doubt that such a mutually satisfactory relationship between these two groups shall continue to flourish.

During the past year, members of the Gulf Coast Section have actively participated in both affairs and administration of the national S.E.P.M., the A.A.P.G., and other national and local societies. This participation involved more of our members and their time than in other years due to the fact that both the A.A.P.G.-S.E.P.M. and the Geological Society of America held their annual meetings in the Gulf Coast.

Membership in our section at this writing stands at 236 active and associate members. This represents a decrease in membership compared to 1962. It would appear that only a very aggressive membership drive can bring our total of members up to the peak of 302 attained in 1960.

Type Locality Unit III is being edited and should be released sometime this year. Meanwhile, tentative plans have been initiated so the the Gulf Coast Section may sponsor one or more field trips to be held in conjunction with the A.A.-P.G.-S.E.P.M. annual meeting which is to convene in New Orleans in 1965.

I would like to express my great appreciation to the members of our Council, our Editor, our business representatives, and those who have served in other capacities whose efforts have done so much to make this year a successful one for the Gulf Coast Section.
