* Abstract extracted from a full paper published in the *GCAGS Transactions* (see footnote reference below), which is available as part of the entire 2016 *GCAGS Transactions* volume via the GCAGS Bookstore at the Bureau of Economic Geology (www.beg.utexas.edu) or as an individual document via AAPG Datapages, Inc. (www.datapages.com), and delivered as an oral presentation at the 66th Annual GCAGS Convention and 63rd Annual GCSSEPM Meeting in Corpus Christi, Texas, September 18–20, 2016.

ABSTRACT

The Who Dat Field, Mississippi Canyon Block 547, Gulf of Mexico, was discovered in December 2007. Prior to LLOG's discovery, all three blocks covering the Who Dat Field had been leased by other larger companies and handed back, undeveloped, to the Bureau of Ocean and Energy Management. The key to success at Who Dat was newer, more detailed, seismic data.
